Critical thinking:

What challenges have you seen in development work that you have experienced or studied? Do you see pieces of the problems described in this module?

What are some other ways you would want to coordinate between organizations? What kind of things would you need to consider to help facilitate this coordination (ex: the different goals and focus of each organization, their resources, etc).

What are some ways you think would be effective to develop a development work strategy for a whole country, and who would be important players in arranging this type of strategy?
